The Industry Leader in Ultraviolet Sterilization

The Twist Series Sterilizers are designed for maximum performance, power, and reliability. Ultraviolet is proven to be safe, dependable and effective in controlling algae and harmful bacteria without leaving any residuals in the water.

We Offer the Best in Design and Quality

Aqua Ultraviolet utilizes the highest quality components designed to work perfectly together. Our design maximizes kill rates, and insures ease of installation and maintenance.

The Leader in Technology and Innovation is Now the Leader in Flexibility

The Twist Series Sterilizers give you the flexibility to custom fit each project. A center union allows the user to turn the inlet or outlet to the direction that best fits the installation. An optional expansion union makes adding on a snap. You can now add on to existing units or join multiple twist units together to achieve the wattage that you need.

Optional Wiper Maintenance Made Simple

The optional wiper allows the Ultraviolet Sterilizer to work at its optimum. With just a pull of the handle the wiper cleans the quartz sleeve without having to disassemble your unit. A clean quartz sleeve allows the Ultraviolet light to penetrate the water more effectively maximizing your UV transmission and kill rates.

The Professional Edge Commitment

The Twist Series Sterilizers will clear green water in 3-5 days, sometimes over night, and keep it that way. Performance is guaranteed when sized, installed and operated according to our instructions.

Scalable Units With Optional Expansion Union
