

AIR STERILIZER
HOME SERIES

**Breathe new life
into your home.**

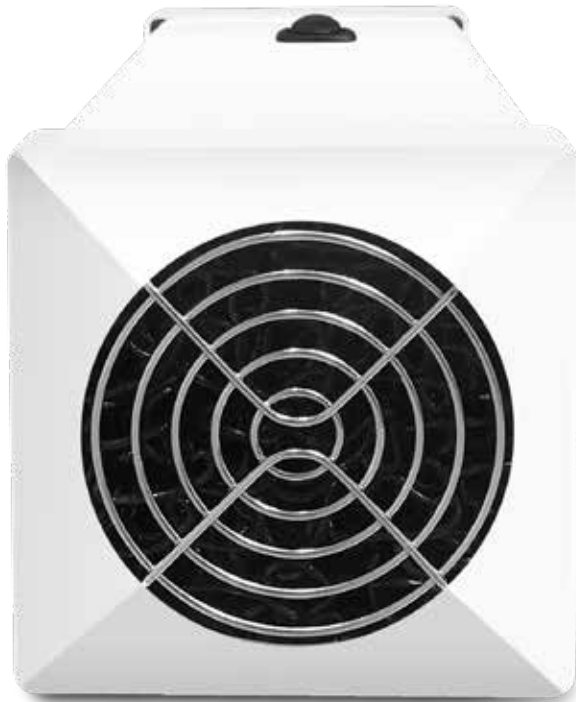

Vacuuming, cleaning, and dusting just aren't enough. Like dirty water, dirty air can bring health hazards. In fact, the air inside your home can contain more pollutants than the air outside. The EPA has even listed indoor air pollution as a major health risk.

With the Aqua UV Air Sterilizer, you can protect your family against airborne mold, viruses, bacteria, fungus, pollens, spores, and dust mites along with odors from pets, smoke, and mildew.

The Aqua UV Air Sterilizer protects your home against airborne pollutants so you and your family can breathe easy.

- An average family spends more than 60% of their time indoors where these contaminants are trapped. HEPA filters in the duct work and room filters aren't effective in reducing single-celled organisms.
- Newer homes are constructed to be more airtight increasing the need to remove VOCs, volatile organic chemicals, which become airborne at room temperature.
- Aqua Ultraviolet air sterilizers eliminate what even the best HEPA filters cannot.

Effortlessly and efficiently clears the air of:

ALLERGENS

VIRUSES

DUST MITES

Starts working for you as soon as you plug it in!
