How Ultraviolet Works

UV is a proven dependable method for controlling algae. The ultraviolet lamp emits a germicidal ray which alters or disrupts the DNA or RNA of single celled organisms. By properly implementing an Aqua Ultraviolet system in-line these organisms can be eradicated effectively without any harmful residuals. UV keeps your water clear by destroying free floating algae.

WATTAGES & FLOW RATES

For Crystal Clear Water:

8 Watt	5 -	200 Gal.	at	642	GPH max
15 Watt	200 -	500 Gal.	at	700	GPH max
25 Watt	500 -	1,200 Gal.	at	1,200	GPH max

As a Clarifier**:

8 Watt	1,500 Gal.	at	1,000	GPH max**
15 Watt	2,000 Gal.	at	1,100	GPH max**
25 Watt	3,200 Gal.	at	1,600	GPH max**

**Water clarity depends on the amount of sunlight, local temperatures, plant coverage, and shallowness of the pond.

- Rids your pond of green water
- Comes complete with Lamp Transformer & Quartz Sleeve
- Use with any existing filter or submersible pump
- Industry's longest lamp life of 14 months
- Easy to install

24" H x 13" W x 17" D

16-1/4" H x 15" W x 16-1/4" D
