

Clear-Line

Irrigation UV/Ozone Combo

25 Watt UV/Ozone Combo 6-8 gpm

40 Watt UV/Ozone Combo 8-10 gpm

- Microorganisms, such as algae, bacteria, and fungi can grow in drip lines and cause clogging problems.
- The Clear-Line system draws ozone and air from the UV unit and injects it into the water line. The scrubbing bubbles keep the drip line free of algae and bacteria. This prevents clogging.
- Saves time, no need to locate clogs and clear or replace line, drip emitters, micro sprinklers and misters.
- When clogs are eliminated water is spread uniformly over plant material resulting in a better yield.

- Longest lamp life on the market, 14 months
- High UV/Ozone output lamp
- Clear quartz cap to see lamp is lit.
- EZ twist cap for easy quartz sleeve maintenance
- Quick release tees for ease of installation
- UV resistant housing designed for maximum flow rates
- Patent Pending
